

# NEW ENGLAND CLEAN ENERGY

## FACT CHECK

**FACT:** New England Clean Energy Corridor (NECEC) brings direct benefits to Maine.

### **\$18 million**

The project will generate \$18 million a year in new tax revenue for host communities, supporting first responders, schools, local infrastructure, and property tax relief.

### **\$15 million**

The project provides \$15 million for fiber optic cable and broadband expansion in Somerset and Franklin counties.

### **\$15 million**

\$15 million for electric vehicle infrastructure, too.

### **\$10.5 million**

And the NECEC will provide economic development and funding of regional tourism in Western Maine.

**Why should we continue to rely on untrustworthy, out-of-state oil and gas companies to power our homes? Mainers deserve better. Renewable hydro-electric power is more reliable and more in line with Maine's values.**

Maine has the opportunity to create high-paying local jobs by importing clean, renewable hydro-electric power from our neighbor to the north. The New England Clean Energy Corridor (NECEC) directly benefits Mainers by expanding broadband access in Western Maine and by lowering wholesale electric costs throughout the state.
